### Product Summary

CBD Extract Capsules come 20 capsules per bottle.

Pure CBD Honey Oil. This clear, clean oil is a full plant extract. An extremely effective medicinal product, this oil has had the THC fractured off (no THC present!) but has all other cannabinoids and terpenes present. Combined with lecithin to maximize the bio-absorption of CBD molecules into the bloodstream.

Good to Know: MCT Oils are extracted from coconut oil and are extremely easy for your body to digest and immediately make use of. Combined with lecithin, they are simply the most bio-available binding agent for cannabis, maximizing the amount of cannabis that ultimately gets absorbed into the bloodstream.
